**Allowable Subject Matter**

Claims 1-21 are allowable.

The following is an examiner's statement of reasons for allowance: the prior art of record fails to teach a lossless coding apparatus and method for a signal in a floating-point format, the method comprising inter alia separating a first input signal in the floating-point format into an integer value and an error, and losslessly compression-coding the integer value and the error using a first coding means; losslessly compression-coding the first input signal in the floating-point format using a second coding means; producing a difference in the floating-point format that corresponds to the difference between a signal in the integer format and the first signal in the floating-point format; and, determining which of the first coding means and the second coding means provides a higher compression efficiency; selecting the coding means that provides the higher efficiency; and, producing an auxiliary code carrying information about the selection result.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

**Citation Of Related Prior Art**

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure:

Yfantis (US 6,633,679) teaches a lossless encoding/decoding apparatus/method.
